Diabetes Centre

Diabetes treatment programme

The ROI Medico Centre has prepared a preventive programme aimed at influencing the risk factors for the development of the metabolic syndrome and diabetes using a natural healing agent – unique mineral water from Rogaška Slatina.

A great deal of emphasis is placed on special ROI Diet diabetes nutrition, individual sports activities and a medical procedure. Continuous blood sugar measurements allow us to monitor your progress and effect of certain activities on blood sugar levels.

To continue activities, guests receive an individualised programme of daily activities to maintain a fit body and a menu for a diabetic diet.

For more information and reservations of packages contact us at: 00386 3 811 40 00 · info@rogaska.si · www.rogaska.si
